

Institute of Higher Private Technical Education
Registered at Nantes Academy – RNE 0 44 2591C

Education in practical business applications which opens access to higher European diplomas

- Insurance techniques
- Insurance business management
- New technologies
- Practical knowledge of English and French

Objectives

- Train foreign students and professionals, in particular from China, as well as from Russia, India and Brazil, in France
- Be an incubator for development projects in China, Russia, India and Brazil, and assist and support international projects headed by French companies with teams of professionals, students, and interns from the world's most dynamic countries
- Make our personal and professional networks available to businesses and be a centre of expertise for each of the countries where students and professionals in training are from
- Be a knowledge centre for the cultures and typical customs of each of these great dynamic countries
- Train the students to use the most advanced technological and technical resources, brought in specifically for instructional purposes

Resources

An innovative pedagogy specialized in the integration of foreign students

- Total, intensive immersion in French business and daily life
- Intensive instruction and assistance to help students quickly learn the necessary concepts, know-how, and customs
- Immediate participation as interns in real business projects
- Knowledge and expertise provided by business people in charge of international development projects
- Analyses, skills and experiences of experienced professionals, executives and senior management of the participating businesses

Innovative technical equipment accessible at any time

- A laptop computer for each intern
- Broadband Internet access for all interns
- Classrooms equipped with WI-FI
- Course materials available electronically

Access to

Outstanding tourist resources that are largely underused in the off-season

- Accommodations and facilities
- Advanced means of communication
- International travel facilities (TGV – Air)
- Numerous excellent cultural and sports facilities

Cutting-edge tools developed by our partners

- Banking and insurance software
- Access to projects designed and implemented at Pierre Attelée Institute
- Outstanding simulation tools for Insurance Companies and Business Games developed by Hausmann Innovation

Relations between students and our select partners

- Close relations with leading businesses and institutions
- Business networking
- Personal, technical sales and financial networking in dynamic areas

Benefits

- Learn a language, the concepts and vocabulary specific to the occupations being studied
- Full integration in real business projects that open the door to real jobs
- Use of new technological applications in a practical setting
- Use of Simassur, a unique simulation tool for case studies that enhances the students' practical experience. (www.hausmann-innovation.fr)
- Use of specialised insurance portals for accelerated immersion learning of professional techniques and knowledge
- Use of advanced computer tools (laptop computers, broadband Internet access, WI-FI, Bluetooth, simulators)
- An outstanding climate and setting combining studies, sports and nature, culture, social gatherings and frequent interaction with local residents for total immersion, to achieve mastery of the two main languages in Europe
